HUM1039 - Project Review 1

Decreasing Poverty Line in Rural & Urban communities by Providing Job Opportunities

ABSTRACT :

⇒ Oxfam commissioned a new global survey done by 295 economists from 79 countries. The Report expects a major increase in home inequality in India & other countries

⇒ People have lost their jobs during covid Pandemic at a very high rate. It is said that 28% of population lives below the poverty line

⇒ Monthly per capita consumption expenditure of Rs. 972/- in rural areas & Rs. 1407/- in urban areas is recommended as the poverty line at the all of India level. The International standards of poverty line is \$1.90/day

METHODOLOGY :

⇒ To reduce Poverty line, we are going to provide job opportunities to people in the name of Future India NGO. The NGO was started keeping the vision of India 2020 by Abdul Kalam Sir. The Future India NGO will provide job opportunities to people in their livelihood to earn through labour. The NGO will first have to invest for getting the raw materials for people & the final products will be sold & also the profits will be shared to the people living in poverty & to investors. The Amount will be provided to the Organization to spread its wings across India where Poverty lives.

⇒ For Investment we will ask everyone to invest if they are interested & willing for change & also volunteers for man power.

⇒ We will provide job opportunities by the following ways given below.

Urban & Rural :

⇒ Biodegradable waste collection - for making organic fertilizer. The wet waste will be collected all over villages & from municipal corporations of the cities. Also, we can also collect from fruit stalls & hotels.

⇒ Incense Sticks from flowers collected from temples all around the city. The urban cities have lots of temples so more flowers are used to decorate the idols & we can use those flowers after decoration for incense sticks.

⇒ Labour work for many small scale industries for production of handicraft items. Pottery, Bamboo handicrafts, Weaving, household handicrafts are all produced & exported.

⇒ Tapioca Plastic Production - I'm not Plastic bag. The starch from the leaves of tapioca plant can be used to biodegradable plastic bags for industrial purposes & to motivate eco-friendly materials.

⇒ Apiculture - for honey & bee waste for bee paper. The Bee box will be provided to people in order to collect honey & remaining bee waste will be used for making paper to motivate ecofriendly products.

⇒ Providing small cattle animals - like goat, sheep, hen, duck. The Cattle will be provided to people & the methods to graze will be taught & all the required instruments will be provided.

⇒ Vegan leather using cacti - The organic leather made of sot cactus (prickly pear) which doesn't use any toxic chemicals in the materials & it is also easily biodegradable. The leather can be used for many other industrial purposes.

⇒ Hemp Production cloth, bags, rope, soap, etc.,. The Cultivation of cannabis with low THC (Tetrahydrocannabinol) content for industrial purposes is encouraged in India.

Expected Outcome :

The People will get a minimum source of income from job opportunities we provide & this will help people to come out of the poverty line & we expect our nation's poverty population to reduce.

SURVEY QUESTIONS

1. What are the basic needs required for poor people?
2. Which basic need do you think will full fill the other needs?
3. Is the government providing their basic needs?
4. What are the problems faced by people below Poverty line?
5. If you get a chance, in what way will you bring out a family from poverty?
6. What do you think about increase in poverty?
7. Will you join our organization?
8. Will you join as voluntary or investor?
9. If you join as voluntary how many hours will you like to spend for organization?
10. If you join as Investor how much money will you like to invest organization?

11. If not as voluntary or investor will
donate for our organization?

12. If yes how much will you donate?
